ABOUT ME

I'm an iOS developer with more than 6 years experience, passionate about mobile development specially but I enjoy learning new things and developing for all kind of platforms and technologies.

During this time developing for iOS, most of the time I've been working with all kind of multimedia frameworks: MusicKit, AVKit (audio and video). I have built a full app from scratch using SwiftUI and Combine with SwiftUI as Source of Truth.

Out of iOS development I've worked with technologies such as: Ruby on Rails projects, Python (Flask), React, AngularJS, Go, Docker, Kubernetes, Jenkins, WebRTC (cordova, iOS native, React) and so on.

My hobbies include: photography (air spotting), hiking, videogames, cooking and for sure I love sunny weather.

LAST PROJECTS

ASAppleMusic (Swift) <i>Swift library to help developers to retrieve Apple Music content.</i> URL: https://github.com/Alexsays/ASAppleMusic
Gas Stations Telegram bot (Swift) <i>Small Telegram bot that shows info about the price for nearest Gas Stations (only working in Spain).</i> URL: https://github.com/Alexsays/GasStationsTelegramBot
