Ziblec Software
Ourense, Spain

2009 — **Application Development (2 years)**
CFP Daniel Castelao
Vigo, Galicia

ABOUT ME

I'm an iOS developer with more than 4 years experience, passionate about mobile development specially but I enjoy learning new things and developing for all kind of platforms and technologies.

During this time developing for iOS, most of the time I've been working with all kind of multimedia frameworks: MusicKit, AVKit (audio and video), also I've been working in R&D projects that include "special" solutions such as: recognition of WiFi networks in iOS 7 without an official API; using Apple Music music mixed with other music services, Open CV image recognition in Objective-C and Swift.

My hobbies include: photography (air spotting), hiking, videogames, cooking and for sure I love to enjoy the sunset over the sea.

Last Projects

ASAppleMusic (Swift)
Swift library to help developers to retrieve Apple Music content.
URL:
https://github.com/Alexsays/ASAppleMusic

Weather sample (Swift)
Simple app using OpenWeatherMap free API developed in less than 4 hours to show weather in a place selected by longpressing in the map.
URL:
https://github.com/Alexsays/WeatherApp

Metro Tenerife Telegram bot (Python)
Small Telegram bot that shows next tram by stops. Hosted in Heroku.
URL:
https://github.com/Alexsays/MetroTenerifeTelegramBot
